Summary

Full Stack Web Developer with a background in CAD design and 3D Printing manufacturing. Impassioned by problem solving coding challenges as a project team member to develop new and innovative web applications. I excel in customer-input driven design, organizing teams for effective work-flow, and fulfilling deliverable deadlines of expected products

Skills

Strong: JavaScript • MySql • Node.JS • Express • jQuery • React.JS • Mongoose
Experienced: HTML5 • CSS3 • MySQL • Git • WebPack • Github • Bootstrap • Material-UI
Tools: GitHub • Heroku
Personal: Problem-solving • Fast-learner • Communication • Team Member

Projects

Adventure Time | Fullstack Engineer & Scrum master | <https://adventure-time-with-friends.herokuapp.com/>

A web application that records and shares recent outdoor trips for other like minded users to connect and explore the great outdoors together

- Personally built many features on the app, notably the API call to autocomplete national park information and drop down a menu for users to input their recent adventure correctly
- Was held accountable for managing the code to keep branches clean and consistent.
- Uncovered, tracked down, and resolved bugs that resulted in a negative user experience or incomplete views.

Kitchen Forager | Fullstack Engineer | <https://kitchenforager.herokuapp.com/>

Find a delicious new recipe by inputting the items already in your kitchen.

- Utilized axios to make an API call on the back-end and respond with information to the front-end.
- Wrote logic to gather and store information to send to the back-end of the application.
- Styled UI with Bootstrap and Icons for a favorable user experience on desktop and mobile.

Choose your Pokemon | Fullstack Engineer | https://azwethinkweizkd.github.io/Choose_Your_Pokemon/

Fun web page that displays pokemon sprites and gifs, as well as records your favorite ones.

- Used JavaScript, jQuery, HTML, and CSS to build single page web application for users
- Implemented a RESTful API for efficient client-database interaction
- Engineered a search bar to allow users to search for desired pokemon

CodeTechChitChat | Fullstack Engineer | <https://code-tech-chit-chat.herokuapp.com/>

Blog website where users can create articles/blogs and comment on others posts

- Built a proper user validated application featuring advanced database relationships
- Gave users access to CRUD functionality for blog posts, comments, and login
- Styled application with Bootstrap for desktop and mobile use.

Work Experience

3DSystems | Biomedical Designer | 2014 - Present

Designed patient specific guides and models for specialized surgery. Manufactured 3D printed medical devices, and performed quality inspections. Hosted web meetings with surgeons to aid in surgical planning by gathering input of expected product. Organized deliverables queue system.

Education

University of Denver

2021

- Certificate in Full Stack Development

Florida Gulf Coast University

2007 - 2013

- Biomedical Engineering
-
